

BIOSTAR®

TECHNICAL DATA SHEET

BIOSTAR® Floc Tab Duplex

Tablet for combined precipitation of turbidity and phosphate

BIOSTAR® Floc Tab Duplex is an innovative combination tablet that combines flocculants and phosphate precipitants to clean pond water of organic and inorganic debris and phosphates.

Purpose:

Reduction of (an-) organic dirt and phosphate content by flocculation and precipitation of small particles. Works optimally at a carbonate hardness of around 0.7 and a pH value of 6.8-7.6.

Advantages:

- Significant simplification of water maintenance due to practical combination tablet
- Fast flocculation and precipitation of impurities and excess phosphate
- Natural prevention of rapid algae growth

Mode of action:

Combination active ingredient in functional tablet form

Dosage recommendation

~ 60 g/m³ water volume | Range: 1 tab for 15,000 l

Place BIOSTAR® Floc Tab Duplex in the water at the pond overflow or pond inlet to the filter system so that it is completely covered with water. If there is no filter system, the tablet can be placed at the edge of the pond.

Storage

Store only in the original container. Store in a dry place protected from the weather. Keep away from food, beverages and animal feed. Store tightly closed and in a cool place. Protect from heat and direct sunlight. Keep locked up and out of reach of children. The product may be stored for at least 24 months under these conditions.

Details:	
Container	Box with 5x 10 tabs à 10g
Range	1 Tab = 15'000 l / 15m3
Item number	030100300
Challenge	C2
