

# BIOSTAR®

## TECHNICAL DATA SHEET

### BIOSTAR® Balance System

#### Granules for mineral enrichment

**BIOSTAR® Balance System** is a natural mineral complex of calcium, magnesium and potassium ions that stabilizes the mineral balance of the pond water, ensuring optimal self-regeneration of the pond water.

#### Purpose:

Targeted ion input stabilizes the carbonate & total hardness of the pond water and strengthens plant structures.

#### Application areas:

In near-natural waters with plant growth, especially in combination with soft tap, well and rain water.

#### Advantages:

- Naturally stabilizes carbonate and total hardness
- Enhances plant structure
- Promotes the natural balance of pond water
- High solubility
- Easy to dose

#### Mode of action:

Stabilizes the mineral system holistically - calcium, magnesium and potassium ions. Increases carbonate hardness and stabilizes the overall hardness of the water and strengthening the plant structure.

#### Dosage recommendation:

~ 0.5 kg/5,000 l water volume | Range: 1 kg for 10,000 l

After initial addition, we recommend checking the pH value and re-dosing if necessary. The product should be applied to the surface of the pond.

#### Storage:

Store in a dry place protected from the weather. Store in a cool, dry place in tightly closed containers. Protect from heat and direct sunlight. Store under lock and key and out of reach of children. The product can be stored for at least 24 months if these storage conditions are observed.

Details:			
Container	0.5 kg	1 kg	5 kg
Range	5 m <sup>3</sup>	10 m <sup>3</sup>	50 m <sup>3</sup>
Item number	2674427000	2674427002	2674427005
Challenge	C3	C3	C3
