

BIOSTAR®

TECHNICAL DATA SHEET

BIOSTAR® Startup P

Powder for the activation of biology

BIOSTAR® Startup P is a powdered pond activator that optimizes and stabilizes pond water based on natural ingredients.

Purpose:

Stabilization of the „pond ecosystem“ by supporting the synergetic balance between plants and animals based on carboxylic acids, lactic acid bacteria, enzymes and minerals.

Advantages:

- Natural stabilization of the ecosystem
- Support of flora and fauna in the pond
- Sustainable care of the pond
- Easy to dose

Mode of action:

Activates and stabilizes biological processes holistically in the pond.

Recommended dosage Initial treatment (spring): ~ 10-25 g/m³ water volume

Retreatment (mid-season): ~ 10 g/m³ water volume

Range: 1 kg for 50,000 l

Pre-dissolve the calculated amount of BIOSTAR® Startup P in a container of pond water and spread it evenly on the water surface or add it via dosing station. Use BIOSTAR® Startup P only at a water temperature of > 12°C, also at night. The success of the treatment depends on the alkalinity of the water, therefore it is necessary to monitor the pH value and correct it if necessary.

Storage:

Store in a cool, dry place in tightly closed containers. Protect from heat and direct sunlight. Store under lock and key and out of reach of children. The product may be stored for at least 24 months under these conditions.

Details:			
Container	0.8 kg	5 kg	10 kg
Range	40 m ³	250 m ³	500 m ³
Item number	2674316000	2674316005	2674316010
Challenge	Startup P / C3	Startup P / C3	Startup P / C3
