

BIOSTAR®

TECHNICAL DATA SHEET

BIOSTAR Algesan® + Liquid for prophylactic algae control

BIOSTAR Algesan® + is a liquid algaecide with long-term effect, developed for acute control of floating, filamentous and smear algae in ponds.

Purpose:

To control various species of algae by inhibiting their photosynthesis.

Advantages:

- Effective and long-acting removal of floating, filamentous and smear algae
- Works for about 3 weeks even against stubborn algae infestation
- Easy to dose

Mode of action:

Inhibits photosynthesis and stops growth and causes dieback.

Dosage recommendation:

~ 50-60 ml/m³ water volume | Range: 1 l for 20,000 l

Shake well before use. Pour calculated amount into a suitable vessel with pond water and distribute evenly on the water surface or add via dosing station. Do not use UV equipment or filtration through activated carbon during treatment. We recommend removing dead algae residues as soon as possible. Use BIOSTAR Algesan® + only for the above purpose.

Storage:

Store only in the original container. Protect from frost. Store in a cool, dry place in tightly closed containers. Protect from heat and direct sunlight. The product may be stored for at least 24 months under these conditions.

Use biocidal products with care. Always read label and product information before use. BAUA No. N-102677
