

# BIOSTAR®

## TECHNICAL DATA SHEET

### BIOSTAR® Swampox

Granules for the decomposition of soil sludge

**BIOSTAR® Swampox** is a powdered pond sludge remover that reduces the formation of sludge at the bottom of the pond and allows it to rise for easy removal.

#### Purpose:

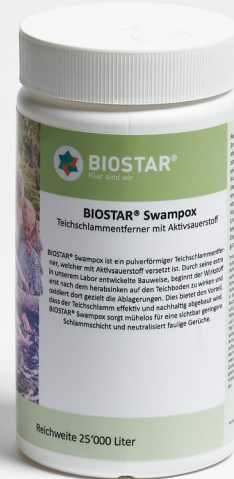

Sustained prevention of sludge formation by means of oxidation of organic materials such as leaves, feed residues, fish excreta and dead plant parts, prevents putrefactive odor.

#### Advantages:

- Prevents sludge formation
- Simplifies sludge removal
- Prevents rotting odor
- Easy to dispense

#### Mode of action:

Oxidizes and decomposes the organic soil sludge in a targeted manner

#### Recommended dosage:

~ 30-50 g/m<sup>3</sup> water volume | Range: 1 kg for 25,000 l

Spread the calculated amount evenly on the water surface. If there are residues on plants, we recommend rinsing them with water.

#### Storage:

Store only in the original container. Store in a dry place protected from the weather. Store separately from acids and bases. Store in a cool, dry place in tightly closed containers. Protect from heat and direct sunlight. Store under lock and key and out of reach of children. Recommended storage temperature: < 40 °C. The product may be stored for at least 24 months under these conditions.
