

BIOSTAR®

TECHNICAL DATA SHEET

BIOSTAR® Oxidur

Liquid for the degradation of pollutants

BIOSTAR® Oxidur is a liquid oxidant based on natural oxygen to promote the breakdown of pollutants in pond water. It saves the natural cycle of the water and secures it from overturning.

Purpose:

BIOSTAR® Oxidur increases the oxygen content of the water, which can become critical at high water temperatures and strong solar radiation. At the same time, it combats putrefaction through its oxidative effect and promotes the clarification of the water.

Advantages:

- High oxidation potential on natural oxygen basis
- Prevents overturning of the water
- Supports clarification of the water
- Very good solubility. Easy to dose

Mode of action:

Oxidizes impurities and counteracts putrefaction, contains active oxygen

Dosage recommendation:

~ 170 ml/m³ water volume | Range: 1 l for 6,000 l Pour the calculated amount into a plastic watering can with pond water and distribute evenly on the water surface or add via a dosing station.

Storage:

Keep away from food, drink and animal feed. Store only in the original container. Provide ventilation of containers. Do not store together with flammable substances. Store in a cool, dry place in tightly closed containers. Protect from frost, heat and direct sunlight. The product may be stored for at least 12 months under these conditions.

This product is regulated by Regulation (EU) No. 2019/1148: All suspicious transactions as well as the loss and theft of significant quantities must be reported to the relevant national contact point.

Details:			
Container	1 l	5 l	10 l
Range	6 m ³	30 m ³	60 m ³
Item number	0101507001	0101507005	0101507010
Challenge	Oxygen	Oxygen	Oxygen
