

BIOSTAR®

TECHNICAL DATA SHEET

BIOSTAR® Oxidur Top

Powder to increase the oxygen

BIOSTAR® Oxidur Top is a powdered oxygen splitter to promote the decomposition of pollutants in pond water which simultaneously increases the total oxygen content in the water. It saves the natural cycle of the water and prevents it from tipping over.

Purpose:

BIOSTAR® Oxidur Top increases the oxygen content of the water and promotes the breakdown of waste substances in the water. This prevents overturning and at the same time promotes clarification of the water.

Advantages:

- High oxidation potential based on natural nitrogen
- Fast action
- Higher activity of pond inhabitants thanks to more oxygen
- Prevents overturning of the water. Supports clarification of the water
- Very good solubility
- Easy to dose

Mode of action:

Splits oxygen to support biological processes and increases total oxygen content.

Dosage recommendation:

- ~ 30 g/m³ water volume | Range: 1 kg for 33,000 l
- ~ 20 g/m³ water volume with fish stocking

Sprinkle the calculated amount onto the water surface. If deposits float to the water surface when the effect begins, remove them.

Storage:

Store only in the original container. Store in a dry place protected from the weather. Store away from combustible materials. Do not store together with metal salts and alkalis (lyes). Store in a cool, dry place in tightly closed containers. Protect from heat and direct sunlight. Store under lock and key or accessible only to qualified personnel or their authorized representatives. The product may be stored for at least 24 months under these conditions.

Details:			
Container	1 kg	5 kg	10 kg
Range	33 m ³	165 m ³	330 m ³
Item number	0101512001	0101512005	0101512010
Challenge	Oxygen	Oxygen	Oxygen
